1 Introduction

In the EasyGo cooperation, the Norwegian Public Roads Administration (NPRA) represents the Toll Chargers (TCs) and Toll Service Providers (TSPs) in Norway. The purpose of this document is to identify these TCs and TSPs. (See chapter 2 and 3)

The document also lists new TCs and TSPs who plan to start operation within a foreseeable future as well as TCs and TSPs who plan to terminate or have terminated operation during the last 12 months. (See chapter 2.7)

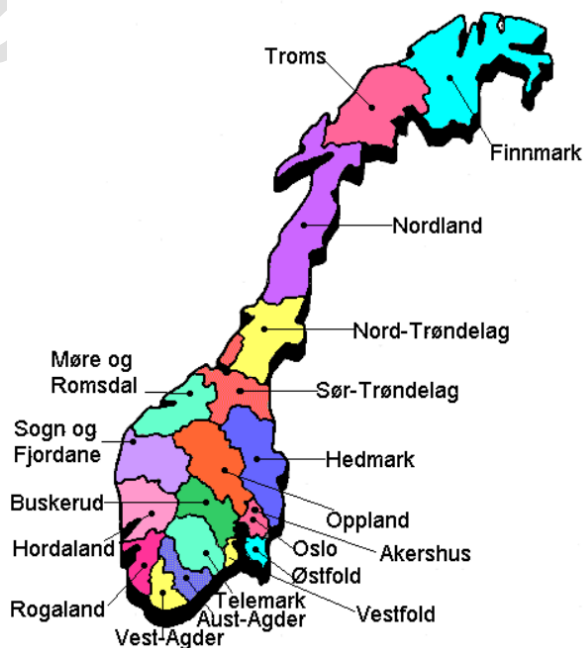

The tolling sector in Norway is currently being restructured and this will lead to significant changes. It has already been agreed to establish one regional TC for each region. The five regional TCs and their corresponding regions are shown in the table and in the map below.

TC	Region	Counties
Fjellinjen AS	Oslo	Oslo and Akershus*
Vegfinans AS	East	Vestfold, Oppland, Hedmark, Buskerud, Telemark, Akershus* and Østfold
Sørvest Bomvegselskap AS	South/West	Sogn og Fjordane, Hordaland, Rogaland, Vest-Agder and Aust-Agder
Vegamot AS	Central	Møre og Romsdal, Sør-Trøndelag og Nord-Trøndelag
Bompengeselskap Nord AS	North	Nordland, Troms and Finnmark

*The toll projects in Akershus are divided between the Oslo toll ring (part of Fjellinjen) and the rest of the toll projects in Akershus (part of region east)

The current TCs within each region will become “projects” under the new regional TCs.

Svinesundsforbindelsen AS on the border between Norway and Sweden is currently not included in any of these regions. Neither are any of the ferry companies. These TCs are listed in chapter 2.6.

Each TC is listed with the formal contact details. Many TCs have outsourced the operation of their tolling systems. The column on the right, “Operation” shows which company is performing the day to day operation. The addresses of these “operators” are listed in chapter 4.

The overview of active TSPs in chapter 3 lists the current TSPs which are all part of the TCs listed in chapter 2. This means that the formal and operational contacts for a TC in chapter 2 are also the formal and operational contacts for the TSP. The restructuring process will reduce the number of TSPs significantly and make them independent of the TCs. Due to the requirements of EETS, external TSPs will also eventually be active in Norway.

The overview of the TCs and TSPs is updated as of the date on the front of this document. This document shall be kept up to date by NPRA.
