# 1 Introduction

The tolling sector in Norway is currently being restructured and this will lead to significant changes. Five regional TCs have been established. These five regional TCs and their corresponding regions are shown in the table and in the map below.

TC	Counties
Fjellinjen AS	<ul style="list-style-type: none"> <li>Oslo</li> </ul>
Vegfinans AS (East)	<ul style="list-style-type: none"> <li>Viken</li> <li>Vestfold og Telemark</li> <li>Innlandet</li> </ul>
Ferde AS (West & South)	<ul style="list-style-type: none"> <li>Vestland</li> <li>Rogaland</li> <li>Agder</li> </ul>
Vegamot AS (Mid)	<ul style="list-style-type: none"> <li>Møre og Romsdal</li> <li>Trøndelag</li> </ul>
Bompengeselskap Nord AS (North)	<ul style="list-style-type: none"> <li>Nordland</li> <li>Troms and Finnmark</li> </ul>

Each of the five regional TCs are listed with contact details and the tolling projects they operate.

Ferry lines are listed separately.

The overview of TSP in chapter 3 includes three different types of TSPs:

- TSPs formally registered as a separate company and no longer has connection to any TC
- TSPs integrated in one of the regional TCs. Such TSP entities shall, according to the tolling reform, be separated from the TC, but in these cases, this is not yet done
- TSPs which from an operational point of view is administered by one of the above TSPs, but the “old” TSP.no. needs to be kept if there are OBEs in circulation with the TSP.no from such an “old” TSP.

When new TCs / projects or TSPs are established, or TCs/projects or TSPs terminate operation, it is the responsibility of each actor to formally inform EasyGo about these changes. EasyGo will then, normally after a three-month period make the relevant change(s) in the Actor Table.

### 3 Norwegian Toll Service Providers

As of 2021 some of the TSP which until now have been part of local TCs, have been sold by the TC they used to belong to, while some are still in the process. Due to local TSPs having issued OBEs with their local TSP no., those local TSPs needs to be listed together with the new TSPs.

All new users will be handled by the “main” TSP in each region and as soon as there are no more OBEs linked to the “old” TSP.no’s, these local TSPs can be removed from the list.
